Space Level BME X7R MLCC

ESCC QPL 3009/041 Approved

The AVX Space, 3009041, BME (Base Metal Electrode) X7R surface mount MLCC QPL approved since 2015. The technology utilizes the leading edge technology in MLCC construction and processing. This technology delivers high reliability with a superior capacitance voltage capability compared values in the smaller case sizes not only reduces the amount of board space used but also the weight of components. The surface mount components also incorporate Flexiterm®, which greatly improves the resistance to the mechanical stress experienced by MLCCs either during assembly or during the product life time. Flexiterm® technology provides greater protection against board flexure and promotes an open circuit failure mode under PCB bend testing.

BENEFITS

- Space BME enables customers to down size MLCCs and save PCB space.
- The Space BME range provides a high CV range 16 – 100 volts, 2.2 n F – 22 u F
- The range comes with Flexiterm® termination which protection against board flexure either during assembly or product lifetime.

If required AVX will produce a data sheet for each part number with the following information:

- a) Impedance/ESR Frequency Sweep
- b) Capacitance Change with Temperature form -55°C to +125°C
- c) Capacitance Change with DC Voltage up to the rated voltage of the component
- d) Temperature Change with AC Current applied for higher capacitance values.
