MegaRAID 93xx 12Gb/s SAS Storage Adapter Drive Compatibility Report Selection Guide

Use this document to match your adapter with compatible drives, as tested by Broadcom® support teams. Broadcom interoperability testing verifies basic functionality between commercially available enclosures, drives, cables, and servers and Broadcom adapters. This testing is not a full integration test effort nor does the testing verify the drive's conformance to industry standards.

Each listed adapter model might not have been tested with each listed drive, server, enclosure, and cable; however, each listed adapter meets the interoperability testing requirements for each listed drive, server, enclosure, and cable.

1 Compatible SAS Drives

The following table shows the SAS drives that are compatible with the adapters in [Table 1, Supported MegaRAID Adapter Models](#). If the drive is a self-encrypting drive (SED), the MegaRAID SafeStore™ Compliant column indicates if the SED passed or failed Broadcom MegaRAID SafeStore testing. *UT* indicates that Broadcom has not tested the SED. A dash (—) indicates the drive is not an SED.

2 Compatible SATA Drives

The following table shows the SATA drives that are compatible with the adapters in [Table 1, Supported MegaRAID Adapter Models](#). If the drive is an SED, the MegaRAID SafeStore Compliant column indicates if the SED passed or failed Broadcom MegaRAID SafeStore testing. *UT* indicates that Broadcom has not tested the SED. A dash (—) indicates the drive is not an SED.
